

How to Cancel Friendship

When you have decided that you don't want someone to have access to you or your information, you have the power to cancel the friendship. This is different than "blocking" in the sense that canceling a friendship still enable that person to see only the limited introductory information but there isn't the option for them to send you messages through the system. "Blocking" prevents the person from even seeing the intro information as well as prevents private messaging.

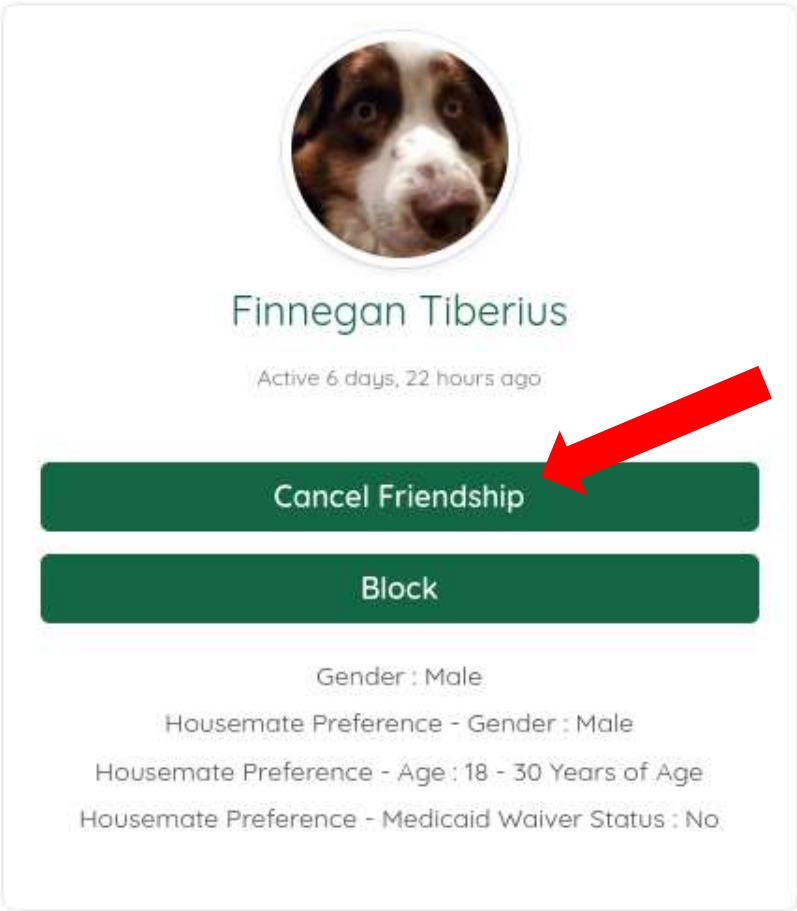

1. First navigate to your Friends page by clicking Friends

2. Then find the friend you wish to cancel the friendship with

- Next select the Cancel Friendship feature

A screenshot of a user profile interface. At the top is a circular profile picture of a brown and white dog. Below the picture is the name "Finnegan Tiberius" in a teal font, followed by the text "Active 6 days, 22 hours ago" in a smaller grey font. There are two prominent dark green buttons: "Cancel Friendship" and "Block". A large red arrow points from the right side of the screen towards the "Cancel Friendship" button. Below the buttons, there are several lines of text: "Gender : Male", "Housemate Preference - Gender : Male", "Housemate Preference - Age : 18 - 30 Years of Age", and "Housemate Preference - Medicaid Waiver Status : No".

- Once you select Cancel Friendship, you will receive a notice indicating that person has been removed and they will no longer show up in your friendship portfolio.
